EDUCATION

Bachelor of Science in Computer Science

Saint Joseph's University

Expected May 2028

Minors: Information Technology, Spanish

Relevant Coursework: Data Structures & Algorithms, Software Engineering

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript/TypeScript, C++, HTML/CSS

Frameworks & Libraries: React, Node.js

Technologies & Tools: Git, PostgreSQL

Concepts: Object-Oriented Programming, Data Structures, Algorithms, System Design, Agile/Scrum

PROJECTS

Stoa, Digital Garden Web App | [GitHub](#) | *React, Node.js, PostgreSQL, Vercel, Prisma, Tailwind CSS*

Mar 2026 – Apr 2026

- Architected a full-stack digital garden platform using Next.js 15, TypeScript, Tailwind CSS, and Prisma, managing complex relational data structures, including bidirectional content links. Dynamic project workbenches, and philosopher profiles backed by a Supabase PostgreSQL database.
- Engineered a tamper-evident originality verification system that generates SHA-256 cryptographic fingerprints of written thoughts upon publication.
- Built an interactive knowledge graph using React to visualize complex intellectual histories and node relationships complemented with a custom anti-algorithmic discovery engine optimize for serendipitous content encounters.

Factsy, Fact-Checking Web App | [GitHub](#) | *React, Node.js*

Jun 2025 – Aug 2025

- Created a React-based web application that integrates Google's Fact Check API which enables users to fact-check and explore the most politically divisive claims in the modern world.
- Formulated a system that supports search suggestions from trending topics and uses advanced filters to access credibility of claims and articles throughout the Internet.

EXPERIENCE

AI Contributor/Trainer

May 2025 – Aug 2025

Outlier, Remote

- Evaluated LLMs based on their responses and reasoning capabilities and provided the necessary feedback for LLMs to generate code more efficiently and effectively.
- Trained models by designing, optimizing, and refining inputs to guide generative AI models toward accurate, relevant, and high-quality outputs.
